5453

After receiving questions from our members regarding 5453 we have clarified with the company and confirm that the proposal discussed in the CLA negotiations has been extended to all Spanish bases regardless of stationed aircraft. This is a U-Turn from the initial requirement to have 4 permanently based aircraft.

From SITCPLA's side, we are not surprised at all to hear this.

We were almost certain this would be the road the company would take, and the 5453 would come anyway. The company has proven this by extending the rollout to all bases in Spain.

If you are considering 5453 and have any doubts or questions that the company can't answer, feel free to message us.

Delayed rosters

We are seeking to confirm the airline has advised/met regulators requirement regarding the delayed roster publication.

Correct LVE entitlement

If your leave entitlement still hasn't been updated correctly following the extension from 8/4 to 9/3 contracts please let us know.

Wishing you all a great weekend,
SITCPLA Reps
