

23rd February 2024

Crew Food Tasting

There will be a crew food tasting event held in BCN next Wednesday. If you have any feedback on the current selection please let Jonay know (jbarrios@sitcpla.es) or message the SITCPLA hotline number.

Some points to consider:

What you like currently and want to remain?

Anything that is really unpopular that should be removed?

What you would like to see?

Salads and hot meal/sandwiches ratio going into summer.

Medical Checks - PMI Base

Despite the agreement with TEC Salud, we have heard that some crew have been asked to pay for their medical check themselves. We have spoken to Silvia (Spain Ops Administrator) and she is investigating the reason for this. We'll let you know once we have clarified this situation. For now, if you have been asked to pay, follow the expenses procedure to claim back the money and please let us know so we can follow up with the company.

Joint Committee

As we mentioned in the last comms, we called a meeting of the joint committee who oversee the application of the CLA.

Our main concerns were that the company aren't applying the new conditions of the CLA in contracts to new CM's and new CTI-F's and we wanted to question the recruitment of permanent PSA's.

While the issue doesn't affect the majority of the community, it does affect some of our members and highlights the problem of the company failing to comply with procedures they have previously agreed upon.

In the meeting the company asked if we would be satisfied if they re-worded the contracts to which we responded yes, if the new wording complies with that of the CLA.

We are now waiting for the revised documents from the company which we will review and will determine if this issue can be closed.

We wish you a great weekend!
